Re: Building Permit #08-00148
Waters Restaurant – Exterior
1200 Carillon Point

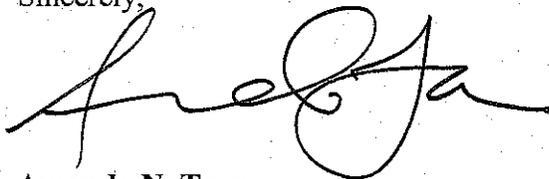

Dear Mr. Geitz,

In regard to your request for additional information on the construction access and equipment for the Waters Exterior project, I have received the following information from the contractor. They have planned with Carillon Properties to use the parking structure that is located south of the building at 2000 Carillon Point as shown on our drawing A2.0 site plan. The steel will be brought around the south side of the building from there.

They anticipate needing a small fork lift for erection, but the parking structure connects to the ground floor lobby, so the equipment could be brought from the parking structure through the lobby to the existing concrete patio outside of the restaurant in order to minimize any impact on the site and its landscape.

If you need any additional information or if you have any further questions please do not hesitate to call.

Sincerely,

Amanda N. Tarr
Project Architect
