**Tree Removal/Pruning Request**

PLANNING DEPARTMENT PM

Please allow a minimum of 10 working days for City response to this request. If you illegally remove trees, the City may pursue monetary penalties and/or restoration under KMC 19.36 or KZC 95.55.

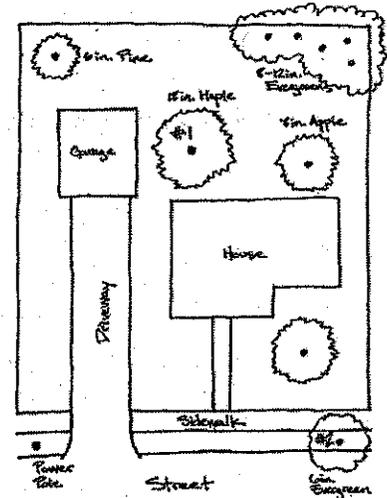

Property Address 10661 Forbes Creek Rd. DR (?) 530 D1  
 Date Feb. 25, 2009 Permit # TRE 09-00039 CRITICAL AREA  
 by 3/11/09 For City Use  
 parcel 709110-0025

**#1: Draw Site Plan Here**

Please see the Attached  
 2 pages!  
 Thanks Lisa Altig  
 would like to get tree #1  
 in picture removed.

- Please show all trees
- Number each tree to be removed/pruned
- Show buildings and roads

Example site plan

**#2: List the trees (private and/or public) proposed to be removed and/or pruned:**

Use additional forms if requesting to remove more trees than space provides.

Tree # from site plan	Type/Species	Size (dia)*	Location	Reason for removal/pruning	Public tree?	For city use
						Public Inv #
(example) #1	Big-leaf maple	18"	East of garage behind house	Remove - rotten in the middle	no	
#1	Yew	13"	In front of house North Side	was broken in snow storm	NO	

\* Measure or estimate the diameter of the tree trunk at 4½ feet above the ground. Note if there is more than one trunk per tree

\* HIGH LANDSLIDE AREA

Next page, please

**#3: A report from a certified arborist\*\*\* is required with this application if:**

- More than 2 trees per year are being removed from private property
- The tree is located in a Sensitive or Critical Area
- The tree to be removed is on the public right-of-way

**#4: For public tree pruning:**

The City, upon reviewing the request, may elect to perform the pruning. If not, a certified arborist\*\*\* is required to perform the pruning of public trees. The arborist will need to meet with City staff prior to pruning. The arborist is to complete the section below.

**\*\*\* To be completed by the certified arborist:** I am a certified arborist, and I guarantee that the work to be performed will conform to current ANSI A300 standards.

Certified Arborist Signature	Print name and company
City Business License #	Arborist certification ID and exp date
	Phone #

**#5: Your contact information:**

Re: 10661 Forbes Creek Rd

Dear Mr. & Mrs. Altig,

As requested, I visited the above referenced property. There is an old house structure on the property that is set to be demolished. The purpose of my visit was to gather information on existing trees in order to be in compliance with the City of Kirkland's **Tree Plan I** requirements. The following report is respectfully submitted.

Please see the attached diagram for approximate tree locations.

Tree #	Species	DBH	General health	Comments
1	Yew	13"	average	recent snow broke major branch
2	Norway spruce	26"	average	
3	Red alder	10"	fair	under utility easement
4	Red alder	12"	fair	

+ GCM

There is no request or recommendation to remove any existing trees from this property. The trees detailed above are the only ones near the existing house. There are no public trees involved with this project.

It is my understanding that the scope of work is only the demolition of the existing house and, that no new structure will be built. The existing structure is set on pier blocks. There is no existing foundation to be removed. The above significant trees are located far enough away from the structure that there should be no need to significantly disturb the critical root area/dripline with the demolition equipment.

The track hoe may need to go over the root area south of the yew tree. This is permissible so long as there is no excavation in the root area and no soil added over the root area. The spruce tree is located so that there will be no need to impact the root area inside the dripline. Since no excavation is required to demolish the house the need for tree fencing is minimal. If anything simple orange plastic perforated fencing should be all that is required and then only on the uphill side of tree 1 & 2. Trees 3 & 4 will not be impacted by the demolition project.

The Davey Tree Expert Company is pleased to be of assistance with your tree care concerns. Should you have any questions please don't hesitate to call my office.

Attachment: site diagram

The first part of the document discusses the importance of maintaining accurate records of all transactions. It emphasizes that every entry should be supported by a valid receipt or invoice. This ensures transparency and allows for easy verification of the data.

Additionally, it is noted that regular audits are essential to identify any discrepancies or errors early on. This proactive approach helps in maintaining the integrity of the financial statements and prevents any potential issues from escalating.

The second section focuses on the role of technology in modern accounting. It highlights how software solutions have revolutionized the way businesses manage their finances. From automated data entry to real-time reporting, these tools significantly reduce the risk of human error and improve efficiency.

However, it also points out that while technology is a powerful asset, it is not a substitute for sound judgment and oversight. Accountants must still exercise their professional skills to interpret the data correctly and provide meaningful insights to management.

In conclusion, the document stresses that a combination of rigorous record-keeping, regular audits, and the effective use of technology is key to successful financial management. By adhering to these principles, businesses can ensure the accuracy and reliability of their financial information, which is crucial for informed decision-making and long-term success.

The final part of the document provides a summary of the key points discussed. It reiterates the importance of accuracy, transparency, and the integration of technology in the accounting process. The document serves as a guide for businesses looking to optimize their financial operations and maintain high standards of accountability.
