VIA ELECTRONIC SUBMITTAL

**RE: Compliance with Federal, State & Local Requirements
AT&T Upgrade Project – 2000 Carillon Point Kirkland, WA 98033
AT&T Site #SB13 Carillon Pt.**

To Whom It May Concern:

The planned upgrade to AT&T's facility located at the address referenced above will comply with all applicable federal and state laws, including Federal Communications Commission ("FCC") and Federal Aviation Administration ("FAA") regulations, and all City codes.

The proposed facility will comply at all times with current FCC regulations prohibiting interference with other wireless communications facilities. This includes interference with any public safety agencies serving local jurisdictions and avionics. Specifically, the facility will not interfere with any municipal radio or wireless data communications equipment operating in the 800 MHz frequency band. All AT&T base station radios meet or exceed FCC requirements for harmonic suppression.

In addition, AT&T will operate this site to comply with all governmental regulatory criteria including MPE RF Exposure and interference matters pertinent to OET Bulletin 65. Based on the frequencies licensed to AT&T, we expect that there will be no interference issues to other communications facilities including additional wireless carriers. In the event that interference is identified, AT&T will immediately work with other carriers to identify, isolate, and mitigate the issues. ☐

I certify that this information is true to the best of my knowledge.

Sincerely,

Jennifer Firestone, PMP
Site Acquisition Manager

STATE OF WASHINGTON)
) SS.
 COUNTY OF KING)

I certify that I know or have satisfactory evidence that Jennifer Firestone is the person who appeared before me, and said person acknowledged that he signed this instrument, on oath stated that he was authorized to execute the instrument and acknowledged it as the Site Acquisition Manager of AT&T Mobility Corporation, to be the free and voluntary act of such party for the uses and purposes mentioned in the instrument.
